WORK EXPERIENCE

DevOps Intern

Jan – April 2026, GECO Philippines Inc.

- Orchestrated the end-to-end deployment of full-stack applications using Docker Compose.
- Managed the complete lifecycle of containerized environments and resolved complex backend-to-database communication issues within a virtualized Linux infrastructure.
- Configured and managed WireGuard VPN instances on AWS, provisioning secure remote access and managing credentials for team members.
- Utilized automated test suites using Selenium to validate critical application paths to improve software reliability.

EDUCATION

West Visayas State University

2022 – 2026, La Paz, Iloilo

Bachelor of Science in Information Technology

Major in Network and Information Security

Iloilo National High School

2016 – 2022, La Paz, Iloilo

Science, Technology, Engineering, and Mathematics (STEM)

SKILLS

DevOps: Containerization, Remote Server Administration, HTML/CSS, JavaScript, PostgreSQL

Cybersecurity Operations: Vulnerability Assessment & Management, Pentesting

Networking: CISCO Packet Tracer, VLAN Configuration, Access Control Lists, VPN Management

Automation Testing: Selenium, Python

Tools & Platforms: Linux (Ubuntu/Kali), Docker, Git, WireGuard, Nmap, Wireshark, SSH

Soft Skills: Professional Communication, Technical Leadership, Project Management, Critical Thinker, Collaboration

CERTIFICATIONS

CISCO: Ethical Hacker

May 2026

CISCO: Network Support and Security

April 2026

CISCO: Junior Cybersecurity Analyst Career Path

December 2025

CISCO: Introduction to Cybersecurity

May 2025

CCNAv7: Switching, Routing, and Wireless Essentials

January 2025

CCNAv7: Introduction to Networks

August 2024

DICT Ro6: Data Privacy Protection Competency Framework (20hrs)

May 2023

PROJECTS

FlexLog

April 2026

A full-stack fitness management system containerized with Docker and previously deployed to the GECO Philippines local server, featuring a state-driven workflow that snapshots routine templates into immutable daily logs.

- Solely engineered and containerized the system using Docker, managing the end-to-end deployment to a Linux-based GECO server during my internship.

SyncedIn

November 2025

A gamified learning app fostering focused self-learning and collaborative engagement.

- Acted as the Project Manager of our startup and designed our branding as well.
- Bagged the People’s Choice Award at the WESTnovation Challenge 2025.
