WORK EXPERIENCE

DevOps Deployment Engineer Intern

Jan - April 2026

GECO Philippines Inc. | Hybrid

- Utilized automated Selenium test suites to validate critical application paths, significantly accelerating the QA testing lifecycle at GECO Philippines Inc.
- Orchestrated the complete lifecycle of containerized full-stack applications via Docker Compose, eliminating deployment bottlenecks and resolving complex backend-to-database communication errors within a virtualized Linux infrastructure.
- Provisioned secure, encrypted remote access for the team by deploying WireGuard VPN instances on AWS, mitigating unauthorized access risks to internal testing environments.

EDUCATION

Bachelor of Science in Information Technology

2022 - 2026

Major in Network and Information Security

West Visayas State University | Iloilo City

- Magna Cum Laude (1.34 GWA/3.55 GPA)

PROJECTS

SyncedIn (Thesis) - a Flutter-based gamified learning app that fosters focused self-study through Gemini AI file summarization, reward-based progression, and real-time collaborative study rooms.

- Designed and executed comprehensive manual test plans across the entire Software Development Lifecycle (SDLC) to validate both frontend Flutter UI and backend logic.
- Directed the end-to-end project lifecycle using Agile methodologies, utilizing Monday.com to coordinate sprint cycles, manage user stories, and ensure seamless cross-functional team alignment.

FlexLog - a full-stack fitness management system containerized with Docker and previously deployed to the GECO Philippines local server, featuring a state-driven workflow that snapshots routine templates into immutable daily logs.

- Engineered and containerized the web applications using Docker, managing the end-to-end deployment to a Linux-based GECO server.
- Validated critical application paths by implementing automated Selenium test suites to verify user authentication (login/sign-in) workflows and core CRUD operations within the containerized environment.

SKILLS

Software Quality Assurance: Automated and Manual Testing

Project Management: Agile Workflows, End-to-End SDLC, Technical Documentation, Requirements Validation (SDD)

DevOps: Container Orchestration, End-to-End Deployment, Linux Server Administration, Secure Network Architecture

Tech Stack: Tech Stack: Node.js, React.js, Python, C++, PostgreSQL, XML, Ubuntu

Tools: Jira, Selenium, Postman, Docker, WireGuard

CERTIFICATIONS

CISCO: Ethical Hacker

May 2026

CISCO: Network Support and Security

April 2026

CISCO: Junior Cybersecurity Analyst Career Path

December 2025

CISCO: Introduction to Cybersecurity

May 2025
